CIHR Using Taxpayer Money To Convince Pregnant Women & Children To Get Vaccine

Brignardello Petersen, Romina Andrea (Individual or sole proprietorships) $1,365,525.00
Mar. 1, 2021

Agreement: Operating Grant: COVID-19 Research Gaps and Priorities (158951) (Mar. 1, 2021 - Feb. 28, 2023)

Description:

The objective is to invest in targeted COVID priority research areas from the Fall 2020 Project Grant competition such as **vaccine hesitancy**, **pregnant** women and children, racialized populations, Indigenous, confidence in science and SARS-CoV-2 variants.

Organization: Canadian Institutes of Health Research

Program Name: Research in Priority Areas

Location: Hamilton, Ontario, Canada L8N 3Z5

If this doesn't make your blood boil, nothing will. CIHR, the Canadian Institutes of Health Research has been handing out public money to pay people to convince others to take the experimental, unapproved, gene replacement "vaccines". And yes, pregnant women are specifically mentioned in these grants.

To make things even worse, the CIHR wants to hire people to convince children to get poisoned as well.

Now, who are the people who have sold their souls in return for getting some sweet, sweet "pandemic bucks"?

Should anyone raise the topic, no, this isn't doxing. If one accepts grants from the Federal Government, it is public, and searchable by anyone. Moreover, it's in the public interest that others know who they are. These people are pushing injections on the general population, most likely without being completely forthcoming.

Interesting to note: most of these grants run until 2022 or 2023. It could be because these drugs are in the experimental stages, and the testing won't be done until then. These drugs are not "approved" by Health Canada, but instead, are given interim authorization under an emergency order.
